MODEL	INPUT COST	OUTPUT COST	COST/GAME	USE CASE	STATUS
DeepSeek V4 Flash	\$0.14/M input	\$0.28/M output	Rs.0.068	All tiers primary	Active
DeepSeek V4 Pro	\$1.74/M input	\$3.48/M output	Rs.0.38	Studio Rs.499+ only	Active

Gemini 2.5 Pro	\$1.00/M	\$10.00/M	Rs.2.76	REMOVED from stack	REMOVED

■ Token Usage Per Game Generation

System prompt (master): ~800 tokens input | User prompt: ~50 tokens input | Game output: ~2,500 tokens output | Total: 850 input + 2,500 output = 3,350 tokens per game

Free credits on new DeepSeek account: 5,000,000 tokens = approximately 1,493 free game generations before any payment required.

■ The S2S Safeguard — How It Works

The Server-to-Server verification ensures every API call is paid for by an ad impression BEFORE DeepSeek is called. This prevents cost abuse completely.

- 1. User taps Generate Game button on app
- 2. AppLovin serves rewarded video / interstitial to user
- 3. Ad completes — AppLovin sends cryptographic callback DIRECTLY to your Supabase Edge Function
- 4. Edge Function verifies callback signature (not from user device — from AppLovin servers)
- 5. ONLY AFTER verification: Edge Function calls DeepSeek API
- 6. Game generated, stored in Supabase, served to user
- 7. If no valid callback: DeepSeek never called — zero cost

4. AD REVENUE ARCHITECTURE — ADMOB (APP)

■ Existing AdMob Account — Mamta's Email (Approved)

Action required: Login to AdMob → Add New App → Zplay → Create 3 ad units → Copy IDs into build.

■ AppLovin MAX Mediation — How It Multiplies Revenue

Without mediation: AdMob offers Rs.80 eCPM for an interstitial impression → shown. With AppLovin MAX mediation: AdMob (Rs.80), Meta (Rs.110), AppLovin own demand (Rs.140), Unity (Rs.70) all bid simultaneously → Rs.140 winner shown. Result: Same impression, 75% more revenue. Zero extra work.

■ eCPM Rates — Verified (AppLovin MAX Mediated)

AD FORMAT	INDIA	SE ASIA / MENA	EU / UK	USA / AU
Banner	Rs.15-25	Rs.85-165	Rs.120-280	Rs.580-900
Interstitial	Rs.90-120	Rs.380-520	Rs.520-750	Rs.1,200-1,800
Rewarded Video	Rs.150-200	Rs.650-900	Rs.900-1,200	Rs.1,400-2,100

■ Revenue Per Game Generation — The Complete Calculation

ONE FREE GAME GENERATION SESSION (all 3 ad types combined):

COMPONENT	AMOUNT	NOTES
Banner (2 positions x Rs.0.015)	Rs.0.030	Feed + game page, always visible
Interstitial (loading screen)	Rs.0.090	Natural pause, user already waiting
Rewarded Video (game over screen)	Rs.0.160	User's voluntary choice, highest eCPM
TOTAL AD REVENUE PER GENERATION	Rs.0.280	India baseline
DeepSeek V4 Flash API cost	Rs.0.068	Fixed, never changes
NET PROFIT PER FREE GENERATION	Rs.0.212	India: 4.1x ratio
NET PROFIT — WESTERN USER	Rs.2.382	USA/AU: 36x ratio

■ Ad Placement Rules — Non-Aggression Principles (LOCKED)

- BANNER: Always visible on feed and game pages — user ignores it naturally — zero frustration
- INTERSTITIAL: Shows ONCE per session during generation loading screen only — max 2/session — never mid-gameplay
- REWARDED VIDEO: Always voluntary — framed as gift ("Watch video to earn 2 Sparks") — never forced
- NO ADS: First session of new user — grace period — let them fall in love first
- NO ADS: For any paying subscriber — zero ads completely
- REWARDED = CURRENCY: Called "Earn Sparks" not "Watch Ad" — psychological difference is enormous

5. WEBSITE AD NETWORK PROGRESSION (zplay.fun)

CRITICAL: Website is ENGINE 1 — PRIMARY revenue source. Same game generated once (Rs.0.068 API cost), stored in Supabase, played unlimited times. Every subsequent play = PURE PROFIT. Zero API cost. Website visitor earns MORE than app user.

■ Why Website Beats App Per Interaction

10. PATH TO Rs.15 LAKH/MONTH — THE TWO METRICS

Everything reduces to two numbers. Hit both by October 2026 and Rs.15L follows automatically.

METRIC 1 — APP	METRIC 2 — WEBSITE
4,500 Western DAU on app	50,000 monthly Western visitors
4,500 x 3 games/day x Rs.2.45 x 30 days = Rs.9,92,250/month	50,000 x Rs.2.00 EPMV (Ezoic) + Web subs + SEO = Rs.5,57,750/month
AppLovin MAX active Day 1 Western eCPM baseline Rs.2.45/gen	AdSense Day 1 → Ezoic Month 2 Pure profit — zero API cost after first gen
COMBINED TOTAL: Rs.15,50,000/month ■	

■ What Must Be True to Hit These Numbers

Western DAU 4,500	Product Hunt launch Day 1 brings 500-2,000 Western users. Reddit r/InternetIsBeautiful post triggers viral Western growth. WhatsApp share loop in India brings DAU organically. Q4 October eCPM surge adds 40-60% revenue boost automatically.
Website 50K Western visitors	Every game gets its own SEO page indexed on Google. WhatsApp shares always link to zplay.fun not app store. Embed widget spreads games to 3rd party Western websites. Reddit posts link directly to game URLs on zplay.fun.
Ezoic active Month 2	Apply to Ezoic the moment 50 game pages are live. Ezoic multiplies AdSense revenue 3-4x with zero traffic minimum. Video ads add 40-60% on top of display ads. Critical for website engine to generate meaningful revenue.
AppLovin MAX Day 1	MAX installed in Capacitor app from first APK build. AdMob adapter connected (existing account). Meta + Unity adapters added Week 1. Every impression auctions across all networks — 40-60% revenue uplift vs plain AdMob.
Creator Economy firing	Rs.50 minimum withdrawal engineered as viral trigger. Every creator withdrawal = WhatsApp share = new creator signups. Creator earnings dashboard shows real-time Rs. accumulating. First creator hitting Rs.10,000 = engineered viral moment.

11. MARKETING STRATEGY — EXACT EXECUTION (ZERO PAID ADS)

■ PHASE 1 — LAUNCH WEEK

Product Hunt Launch	Submit Tuesday (highest traffic). Title: "Build any game in 60 seconds — no code". Get 50 upvotes from network before going live. Engage every comment personally for 24 hours. Target: 500-2,000 Western signups Day 1.
Reddit r/InternetIsBeautiful	Post the Bumrah vs Kohli cricket game directly. Title: "I typed one sentence and AI built this playable cricket game". Show gameplay GIF in post. Link to zplay.fun/game/cricket . Target: 50,000-500,000 impressions.
Warm India Launch	WhatsApp broadcast to Harshali Academy parents: "Maine ek game banaya — aap bhi bana sakte ho". Include pre-built cricket game link. Zero selling. Pure sharing. Target: 2,000 downloads Day 1.
Neetiveda Channel	Post Constitution quiz game. Caption: "Made in 90 seconds by AI". Link to zplay.fun . Target: 500-1,000 new users from existing subscribers.

■ PHASE 2 — MONTH 2-3

Reddit Gaming Communities	r/webgames (150K members), r/gamedev (1.2M), r/indiegaming. Post one genuinely impressive game per week. Never mention Zplay in title — show game first. Game quality must speak first.
Creator Earnings Story	Engineer first creator to earn Rs.10,000+. Give free Pro access + featured placement. When they hit Rs.10,000 — help them write their story. Post everywhere: "Indore ke Ramesh ne apne phone se Rs.10,000 kamaye". This is your tipping point moment.
WhatsApp Creator Community	Build Zplay Creator WhatsApp group (500 max). Every Rs.50+ withdrawal = screenshot in group. "Top Creator This Week" pinned every Monday. Group becomes social proof engine automatically.
IPL Cricket Special	10 IPL team games pre-built before IPL season. Share in official fan WhatsApp groups of each team. CSK fans get CSK game, MI fans get MI game. Massive organic cricket community sharing.

■ PHASE 3 — MONTH 4-6

LinkedIn Founder Story	Virendra posts: "19 years banking → built game platform in 7 days with AI". Honest story with real numbers. Target 500+ connections = 50,000+ impressions organic. Tech startup community attention.
College Campus Program	10 engineering colleges in MP/Maharashtra. Certificate: "Certified Zplay Game Creator" for 5+ published games. College shares on official social = campus reach. Target: 2,000 student creators in 2 months.
Arabic/MENA Expansion	20 Arabic gaming Telegram/Discord communities. First 50 Arabic creators get 1 month Pro free. Key message: First platform generating games in Arabic from Arabic prompts. Target: 5,000 Arabic MAU.
YouTube Micro-Influencer	10-50 gaming YouTubers with 10K-200K subscribers. Send pre-made game about their channel as demo. They demo it = audience downloads. Zero cost. Potential 500K+ reach.

13. LOCKED DECISIONS — NEVER CHANGE

These decisions are final. They were arrived at through extensive analysis and are not to be revisited without very strong evidence.

■ Platform Identity

- Platform name: Zplay
- Domain: zplay.fun (Rs.229/yr first year)
- Tagline: "Build any game in 60 seconds. No code. Get paid."
- Primary market: Western (USA/UK/EU/AU) from Day 1
- Secondary market: India served via auto language detection

■ AI Architecture

- Primary AI: DeepSeek V4 Flash at Rs.0.068/game
- Premium AI: DeepSeek V4 Pro at Rs.0.38/game (Studio tier only)
- Gemini: Removed entirely from stack
- Groq: Removed (account restricted)
- Hard token cap: 4,500 max_tokens per generation
- S2S AppLovin callback required before every API call

■ Revenue Architecture

- Website is Engine 1 — PRIMARY revenue source
- App is Engine 2 — creation tool that feeds website
- Zero secondary token cost: game stored once, played unlimited times
- Every web play after first generation = pure profit
- AdSense Day 1 → Ezoic Month 2 → Playwire Month 4-5
- AppLovin MAX mediation active from first APK upload
- Western eCPMs are the baseline assumption, not aspiration
- 36x revenue-to-cost ratio is the Day 1 operating number

■ Creator Economy

- Creator ad revenue share: 40% creator, 60% platform
- Creator game sale share: 70% creator, 30% platform
- Minimum withdrawal: Rs.50 India (UPI) / \$2 Global (PayPal)
- Rs.50 minimum is a growth hack — every withdrawal = word of mouth
- Creator boost program: 100% platform revenue
- APK export: Rs.499 one-time, 98% margin

■ Payment Stack

- India collections: Razorpay (existing)
- Global collections: PayPal Business (existing)
- India creator payouts: RazorpayX UPI
- Global creator payouts: PayPal Payouts API
- No Stripe — PayPal covers global sufficiently

■ Non-Aggression Ad Rules

- Banner: Always on — user ignores naturally
- Interstitial: ONCE per session during loading screen only
- Rewarded video: Always voluntary — framed as gift not gate
- No ads: First session of new user (grace period)
- No ads: Any paying subscriber — zero ads completely
- Max 2 interstitials per session — never more
- Never show ad mid-gameplay — only at natural pauses

■ Two Sacred Metrics

- METRIC 1: 4,500 Western DAU on app by October 2026
- METRIC 2: 50,000 monthly Western visitors on zplay.fun by October 2026
- Both tracked daily — both equally important
- Neither is optional — neither is secondary
- These two numbers = Rs.15 lakh/month net profit
